

Auto Sense Safety Gate

The Premium Standard in Hands-Free Home Safety

Designed to make everyday parenting easier, the Autosense Baby Gate combines intelligent technology with dependable safety to create a seamless, hands-free experience for modern homes.

Effortless, Intelligent Access

Smart Infrared Motion Detection: Featuring advanced infrared sensing with a wide 45° detection range, the Autosense Gate recognizes your approach and automatically unlocks, allowing you to move through with ease while carrying your little one.

Added Confidence with Smart Alerts

Secure Closure Notification: For added peace of mind, the integrated alert system notifies you if the gate is not fully closed or securely latched, helping ensure your home remains protected.

Smooth Automatic Closing

Precision Auto-Close System: Engineered with a balanced gravity-assisted mechanism, the gate gently swings closed and locks securely behind you, delivering reliable performance with every use.

Built for Everyday Durability

Premium Steel Construction: Crafted from reinforced alloy steel with a sleek, fingerprint-resistant finish, the Autosense Gate is designed to complement modern interiors while providing lasting strength and dependable protection. Built to meet ASTM F1004 safety requirements, it offers confidence without compromising on style.
