

loveⁿcare™ | Glide sleeper

n

FEATURES:

- The Love N Care Glide Sleeper is our most innovative crib to date. It is primarily intended as a pleasant place for your baby to sleep for the first 6 months, but it has a plethora of features.
- It improves sleeping patterns, makes nighttime feeding and comforting easier, and promotes baby-parent attachment. The Glide is a terrific three-in-one solution that can be used as a side-sleeping crib, a stand-alone crib, or a travel cot with the attached travel bag.
- The Glide Sleeper enables you to sleep near to your infant without sharing a bed. Your baby can safely sleep in the crib next to you, allowing you to respond quickly, whether it's for feeding, changing, or cuddling.
- Because of the built-in automatic glide function, our Glide Sleeper can also help new-borns improve their sleeping patterns. The crib features three glide settings that are designed to mimic the action of a smooth glide as if they were in your arms. This may be easily set on the built-in timer.
- As if that wasn't enough, the Sleeper contains three built-in tracks to encourage a peaceful sleeping atmosphere.
- The Sleeper may be adjusted five degrees to ease baby's digestion, breathing, and reflux. The permeable mattresses and two huge mesh windows aid in airflow through the crib.
