# HISTORY ROLLS ON

As early as 1937, we have done our best to improve the lives of new parents by developing functional, versatile and innovative prams. The entire Mutsy collection is modular and versatile in such a way that it offers an appropriate system for every family and during every phase. A great deal of care is devoted to the ergonomics and safety of the child when developing each Mutsy product. For example, it is important that the angle between the backrest and the seating of the pushchair seat can be adjusted and that the child can rest in a fully reclined position. Comfort for parents has also been considered. All Mutsy pushchairs are a pleasure to use for a walk thanks to their manoeuvrability and the ergonomic push bar. Moreover, all chassis offer convenient transport and storage. Versatility, focus on ergonomics and ease of use, and all this in a stylish design: that is what we call 'simple human magic'!

# IGO

## FARMER EARTH

+ farmer standard chassis

## PURE FOG

+ pure standard chassis

## URBAN NOMAD

+ pure dark gray chassis

The Igo, Mutsy's latest luxury pram: a pleasure to use and for strolling, both for the parent and the baby. The Igo has an ultra-light carry cot that weights only 3.4 kg. The Igo seat has a soft cushion and can be clicked onto the chassis in 2 directions. In addition to springs on the back axle, the Igo chassis also has front wheel suspension for extra comfort on rough grounds and it is available in standard colours: silver and dark grey. Moreover, the Igo is fitted with a leather-look grip and a bumper bar.

### Technical characteristics of the Igo:

product description	complete product	product without wheels
Igo	8.7 kg	5.6 kg
Igo seat	4.5 kg	-
Igo carry cot	3.4 kg	-

product description	length	width	height
unfolded chassis	80 cm	58 cm	110 cm
folded chassis	70 cm	58 cm	39 cm
folded chassis without wheels	63 cm	49.5 cm	18 cm

# IGO - PURE FOG

We are surrounded by beautiful nature, which we love to enjoy. Yet this nature is vulnerable. That is why we strive for a greener world; to leave something beautiful for our children.

The Pure series consists of two refreshing colour combinations with a 100% cotton lining and an exterior fabric made from 100% recycled PET. This fabric, made from used PET bottles, is a beautiful environment-friendly material. Although the fabric is technically strong, it feels very pleasant thanks to its soft texture and breathable characteristics. The accents of the Igo Pure are light, nearly white in colour and very modern in design - typical of the Mutsy Igo series

edition *Igo Pure Fog + pure standard Chassis*

# IGO - FARMER EARTH

The Farmer model reflects a certain lifestyle, the appreciation of durability, healthy and genuine food and a love for farming life. Just dream away with us about eating a ripe tomato. Flowering meadows with gentle and lively colours. Hopping around with the goats under the sun and feeding the chickens together with your kids.

Simple pockets finished with thick stitching, exterior materials with a wool, herringbone and jute look in natural colors, a quilted lining of organic cotton, metal accents that reflect durability and dark-brown synthetic leather accents for a timeless look. These are the characteristics of the Farmer style.

**edition** Igo Farmer earth + farmer standard Chassis

# IGO - URBAN NOMAD

Urban Nomads, with their laptops and smartphones in hand, live and work in urban areas. Instead of renting office space, they prefer to go into a coffee shop and work there quietly. They want to discover the world and to raise their children in a challenging multi-cultural and diverse environment without losing sight of the comfort and well-being of their child.

With emphasis on ergonomics and flexibility, a design that is compact, lightweight and easy to store and of course natural colours and a modern leather finish, this Urban Nomad model meets all wishes

## URBAN NOMAD

*+ pure dark gray chassis*

*(Carry Cot and Maxi - Cosi Car Seat and adapter sold separately)*

The Mutsy Evo makes its users feel as if they are walking on air. It is so comfortable for parents and the baby and in addition, it is so simple to use. The front wheels swivel 360° to provide much needed manoeuvrability in the city. The front wheels can be fixed for use on natural terrain, so that it is easily pushed on sand or on forest ground. The Evo can also be used with various inserts, such as a spacious carry cot, a hardened shell-type seat and various types of car seats (group 0+). In addition, the seat can be positioned in two directions. To sum up: class and safety combined with fantastic ease of use.

## EVO - URBAN NOMAD - LIGHT GREY

Urban Nomads have environmental awareness, prefer to use public transportation instead of cars, buy recyclable and biodegradable packaging and organise clothing exchanges. They read the news and magazines online. They seek sustainable and mobile solutions, without compromising on the well-being of their babies or themselves.

With its emphasis on ergonomics and flexibility, a compact and lightweight design, easy to store and with its natural colours and modern synthetic leather finish, this Urban Nomad model meets all the requirements.

# EVO - INDUSTRIAL ROCK

The Evo Industrial pays homage to the daily reality of young parents. The collection is made from materials that can brave the elements that we are exposed to daily.

We love denim because of its authentic look. In addition to denim, only leather is capable of ageing so nicely. That is why we have combined these robust materials in a timeless style with focus on the smallest details. The leather straps of the grip, the metal teeth of the zipper, the rivets, perforated leather and the cool stitching: together they constitute the Evo Industrial, the ultimate pushchair in its purest form.

# NEXO

The Nexo has a refreshing look, soft upholstery with leather accents. There are also lovely matching accessories available!

The Nexo range is available in 2 colour combinations:

- Blue melange with cognac accents and a silver frame
- Mist melange with cognac accents and a black frame

**edition** *Nexo Mist Melange*

# NEXO

The little brother of the Igo is a practical pram with an adjustable seat and height-adjustable handles. The fully reclined position and the front wheel suspension offer optimal comfort for a napping child.

The back support can be readjusted by using the button at the backside. The swivelling front wheels ensure a comfortable ride anywhere with this handy pushchair. To sum up: a compact buggy that is very easy to fold and to use. The frame of the Nexo is the lightest of its kind, only 5.7 kg!
