

MILA **ELECTRIC** RECLINER GLIDER CHAIR

Taupe Teddy

Let the world slow down around you while you rest, recharge, and reconnect — with your baby and yourself. The Mila Electric Recliner Chair is designed to be your sanctuary of comfort, helping you unwind while keeping everything you need within easy reach. With a built-in USB and USB-C charging port conveniently placed on the outer armrest, you can recharge your mind and your devices without ever leaving your seat.

Created with care to support you through the fourth trimester and beyond, Mila makes those early months of feeding and bonding feel a little easier — especially after a c-section birth.

The smooth electric recline function allows you to lean back or sit upright effortlessly with just the touch of a button. Its ergonomic design gently supports your back and shoulders, while thoughtfully positioned armrests cradle you in comfort during feeding or soothing sessions.

Featuring a 240-degree swivel base and a tall backrest for extra head and back support, Mila moves with you — offering the flexibility and comfort you need as you care for your little one.

Wrapped in a luxurious, an irresistibly soft woolly taupe teddy fabric, Mila combines timeless elegance with everyday practicality. Its sleek silhouette fits beautifully into any nursery or living space, making it as stylish as it is functional. Transition seamlessly into a reclined position with elevated leg support, perfect for resting, feeding, or simply taking a quiet moment to breathe.

The one-action recline design ensures smooth, synchronized movement — no pushing, no awkward adjustments, just effortless comfort at the touch of a button. The ergonomically sculpted armrests are perfectly positioned to ease shoulder and arm tension, giving you full-body support while you feed, snuggle, and bond. It's a chair that seems to know exactly what you need — even before you do. This isn't just a piece of furniture.

It's your sanctuary — a place to rest, restore, and be fully present in the beautiful stillness of the moment.
